NOT LABELED FOR RESALE

64853-801J

Do not use in systems that are not designed to accept flushable wipes, including, but not limited to, those for alternative septic or household pump systems, systems in which grease or fat disposal share a drain pipe, systems with history of slow flow and/or clogs, macerator toilets or household pump systems, if advised by system operator, if unsure of system capabilities. For these systems, do not flush wipes but dispose in trash receptacles. If problems develop or persist, discontinue use immediately. Failure to follow these instructions may result in clogged systems and/or property damage. Flushable per INDA Guidelines; tested in scope by IPS Testing, an ISO/IEC 17025 accredited lab.

REFILL DIRECTIONS:

- Tear open refill and simply place wipes in your existing tub.
- Insert corner of sheet through the lid opening.
- Replace the tub lid and dispense. The next sheet pops up automatically.
- Keep lid tightly closed.
